

# TIME SAVER PIPE™

Underground Insulated Hydronic Pipe

*Perfect for all Hydronic Heating & Cooling Systems*

*Flexible and Easy to Install*

*Made With Quality and Affordability in Mind!*

**“Because Quality Matters”**

*Available in 100' - 500' rolls  
Wrapped in 4 Layers  
of MicroFoil Insulation*

**Time Saver Pipe = Protection & Flexibility = Peace of Mind**

# Save time, money and labor with this user friendly hot water pipe. **TIME SAVER PIPE**

The outer skin is a solid 4" corrugated Polyethylene plastic. It is strong, lightweight and flexible, when installed properly it won't break or crush and resists acids, and freezing temperatures. High density polyethylene is one of the most chemically inert of all plastics, and therefore is extremely chemical and corrosion resistant. Life service is 30-50 years. It is not recommended to back fill with gravel. Always inspect the trench for sharp objects.

- Benefits include:**
- High temperature rating
  - High pressure rating
  - Uses less fittings
  - Encrustation resistant
  - Corrosion resistant
  - Freeze resistant
  - Quieter than copper & CPVC
  - Light weight & flexible
  - Long life expectancy
  - Environmentally Friendly
  - Year-round Installation

SYSTEM	TUBINGS	FITTINGS
Open & Closed	Barrier/ Non-Barrier	Crimp & Compression
Open & Closed	Pex-Al-Pex	Crimp & Compression

What is PEX tubing? Tubing specifically suited for hydronic open and closed systems and potable water plumbing systems. This PEX tubing is for water distribution. The basic building blocks of PEX are cross-linked polyethylene molecules. Which have been physically and chemically modified. This process increases the elasticity of the pipe as well as perfects the performance giving it a long useful life.

- Time Saver Pipe is insulated with foil & foam not bubble wrap .
- Time Saver Pipe can be made to meet special needs, i.e. heat tape, 3rd tube, or single line.
- Time Saver Pipe can be used in most hydronic heating and cooling systems.
- Time Saver Pipe can be custom cut to any length. The standard roll size is 250 ft.
- Time Saver Pipe is available in roll sizes up to 500 ft. without a splice.
- Time Saver Pipe ships via common carrier, banded and shrink wrapped on a 4' x 4' pallet.
